Summary

I design B2B software: ERP modules, dashboards, internal tools and mobile apps for operations teams. Since 2024 I've been the only designer on a live ERP platform, and I led its design system, Iksir (1,033 variables, 24 components), designed to WCAG 2.1 AA with Arabic/RTL support from the tokens up. Arabic is my first language, and I also work in French and English.

Experience

Product Designer | Nawat Studio

Tlemcen, Algeria (Remote) | Jan 2026 - Present

- Founded an independent product design studio for B2B and enterprise software. Datamaster Analytics is its first client.
- Led the Iksir design system for Datamaster's web and mobile products, working with a second designer whose work I reviewed. Three-layer tokens and support for Arabic (RTL), English and French. V1 shipped with 1,033 variables, 24 components and a documentation site that non-designers use.

Product Designer (Contract) | Datamaster Analytics

France (Remote) | Sep 2024 - Present

- Only designer on a growing ERP platform, working daily with business analysts, tech leads and developers. Started as UI/UX Designer and moved to Product Designer after 3 months.
- Designed 5 core ERP modules: B2B Sales, Purchase, POS, Finance and Accounting. The B2B Sales module is now on its 9th major revision with the dev team.
- Designed Task Master, a task app for supermarket staff on mobile, tablet and desktop, over 2 iterations. It is in production, and usability tests with real staff showed inventory tasks taking about half the time.
- Leading an information architecture restructure of the whole platform ahead of a full redesign.

UI/UX Designer | Five Angles

Dubai (Remote) | Mar 2024 - Dec 2024

- Designed the Super Admin, Admin and Teacher dashboards for a multi-role e-learning platform.
- Redesigned a real estate platform and designed a case management system for a charity.
- Designed landing pages for the agency's clients in several industries.

Co-Founder & Product Design Lead | Atqin

Tlemcen, Algeria (Volunteer) | 2023 - Present

- Co-founded a volunteer community of Algerian tech professionals and coordinate its team projects.
- Designed a management platform for a nonprofit network of Quran clubs and a website for a historic cultural institution.

Skills

- **Product design:** UX/UI design, interaction design, information architecture, user flows, wireframing, prototyping, usability testing, user research
- **Design systems:** design tokens, component libraries, documentation, accessibility (WCAG 2.1 AA)
